EDUCATION

Western Governors University

M.S. Cybersecurity and Information Assurance

- WGU Excellence Award Secure Network Design

Online

Expected March 2027

Rochester Institute of Technology

B.S. Computing Security.

Rochester, NY

May 2022

Finger Lakes Community College

A.S. Information Technology: Networking and Security

Canandaigua, NY

May 2016

EXPERIENCE

Wayne Finger Lakes BOCES - Edutech

IT Support Technician II

- Engineered a comprehensive device management solution by fully configuring JAMF Cloud for iPad and Mac devices for the Geneva City School District
- Improved endpoint management and enterprise security posture by leveraging Microsoft Intune, Entra ID, and M365 Security Centers
- Managed group policies for Apple, Chromebook, and Windows devices, and created technical documentation that earned positive feedback from technical directors

Newark, NY

October 2022 - Present

Finger Lakes Community College

Adjunct Professor

- Instructed CSC-153 Introduction to Cloud Computing, CSC-253 Cloud Operations, CSC-272 Linux, and CSC-273 Ethical Hacking, managed laboratory grading, and hosted office hours to support student learning.
- Created instructional videos and hands-on labs for students to enhance course engagement and practical execution.
- Achieved high student and faculty satisfaction, securing the role through a direct recommendation from a Rochester Institute of Technology professor.

Canandaigua, NY

January 2023 - Present

General Dynamics Mission Systems

IT Engineer Intern

- Configured and deployed virtual machines utilizing VMware vSphere, while administering Linux and Windows servers.
- Researched emerging technologies and executed practical solutions for support tickets originating from active job sites
- Collaborated on large-scale infrastructure projects by assisting in the physical configuration of network racks

Pittsfield, MA

May 2020 – December 2020

Certifications

ISC2 CC

November 2025

Microsoft Azure 900

September 2025

AWS Certified Cloud Practitioner

May 2025

IBM Cyber Security Analyst Certificate

February 2025

PROJECTS

Multi-Cloud Infrastructure & Lab Deployments

Current

- Deployed and secured primary cloud infrastructure on AWS to host technical assets, utilizing EC2 instances, S3 buckets, custom VPCs, Route 53 DNS routing, and Key Management Service (KMS)
- Implemented cloud security governance and automated monitoring using AWS Inspector for vulnerability scanning, Security Hub for posture management, Systems Manager for configuration tracking, and strict IAM Roles.
- Engineered isolated enterprise lab environments within Azure to conduct security testing, utilizing Azure VMs, Entra ID for identity management, and Azure Key Vault.

Home Lab Infrastructure

Current

- Built a bare-metal hypervisor environment using Proxmox VE to host, segment, and orchestrate virtual specialized networks.
- Administered core network services and systems leveraging Red Hat Enterprise Linux (RHEL) and containerized applications via Docker for optimized resource allocation.
- Conducted routine penetration testing and vulnerability assessments within an isolated environment to simulate threats, evaluate network security controls, and practice remediation.

TECHNICAL SKILLS

Cloud Infrastructure & Security: AWS (EC2, S3, VPC, Route 53, IAM, KMS, Inspector, Security Hub, Systems Manager), Azure (VMs, Key Vault), Entra ID, M365 Security Centers. **Security & Testing:** OWASP ZAP, Burp Suite.

Virtualization, DevOps & Tools: Proxmox VE, Docker, VMware vSphere, Microsoft Intune, JAMF Cloud, Cisco Meraki, cPanel.

Operating Systems & Administration: Red Hat Enterprise Linux (RHEL), Windows Server/Client, Linux, macOS/iPadOS, Group Policy Management.

Security & Networking: Penetration Testing, Vulnerability Assessments, Wireshark (Packet Analysis).

Programming & Scripting: Python, Java, JavaScript, C, PowerShell, Bash, HTML/CSS.
